PROVIDE ALL ORIGINAL SPARE PARTS OR We Provide Trial Facility For Decanter Centrifuge.

With

Registered Business in UPIK® Reference.217597 (D&B D-U-N-S® Germany)

- Incepted at Pune (Maharashtra, India), we, “Iskcon India Process Equipment”, are one of the leading names engaged in manufacturing and supplying a comprehensive assortment of **Ribbon Blender, Decanter Centrifuge, Volute Screw Filter Press, Storage Tank, Double Cone Blender, Fluid Bed Dryer, Cyclone Machine, Heat Exchanger, Structural Frame, Bag Filter, Rotary Valves, Centrifuge Machine, and Raw water or Waste water Treatment Piping etc.** Manufactured using optimum quality raw material and sophisticated technology, these are designed with high precision in order to meet the international standards. These products are widely appreciated among our esteemed clients due to their features like dimensional accuracy, rigid construction, corrosion resistance, low maintenance and longer service life. As per the varied requirements of clients, these can also be availed by them in both standards as well as in customized options as per their different specifications. The offered products can be availed by clients from us in various sizes, patterns and dimensions as per the variegated requirements of clients.
- Our robust infrastructure is well-resourced with large manufacturing facility that enables us to manufacture bulk quantities of products in conformity with the global quality standards. Manned by a team of highly qualified professionals, the entire facility is outfitted with advanced machines and technologies. All the functional departments are properly managed in order to carry out the whole business operations in a systematic and timely manner. Also, our infrastructure is well-connected with all modes of transportation that enables prompt delivery of products at client’s end. Apart from this, we have selected a team of young, energetic and qualified professionals, who hold immense years of experience in their respective domain. Our team is an inseparable part of the firm, who works with close harmonization for contributing towards our success and growth. They work under varied functional units and supervise the entire business operations to attain the defined goals of our organization and achieve premium client satisfaction.
- Due to our elevated quality standards followed throughout our operations, we have been able to offer an optimum quality assortment of products to our customers. As quality being the hallmark of our firm, we have appointed an expert team of quality controllers, which conducts stringent tests of our offered product range on specific parameters before these are delivered at clients’ end. Furthermore, as per the advice of the expert technocrats and current quality trends, we follow various management policies to inspect the raw material, supervise the production process and check the finished products for any kind of defect. Since the inception of our company, the prime objective has been to minutely comprehend the exact requirements of our clients and to offer them the desired products maintaining the quality as well as durability. Being client centric firm, we design our norms keeping the variegated demands of our clients in mind in order to achieve the utmost customer satisfaction. Our team of customer care executives possesses in-depth knowledge in this domain, which enables them to provide effective after sales support to our prestigious clients. We have been able to garner vast base of satisfied customers spanning all across the world due to our ethical business practices, client centric approach and transparent dealings.
